# ODOO PLUG-IN

# ODOO DHL ECOMMERCE PLUG-IN INSTALLATION INSTRUCTIONS

Follow the steps below to install and configure the DHL eCommerce plug-in in your Odoo system:

## Download the plug-in

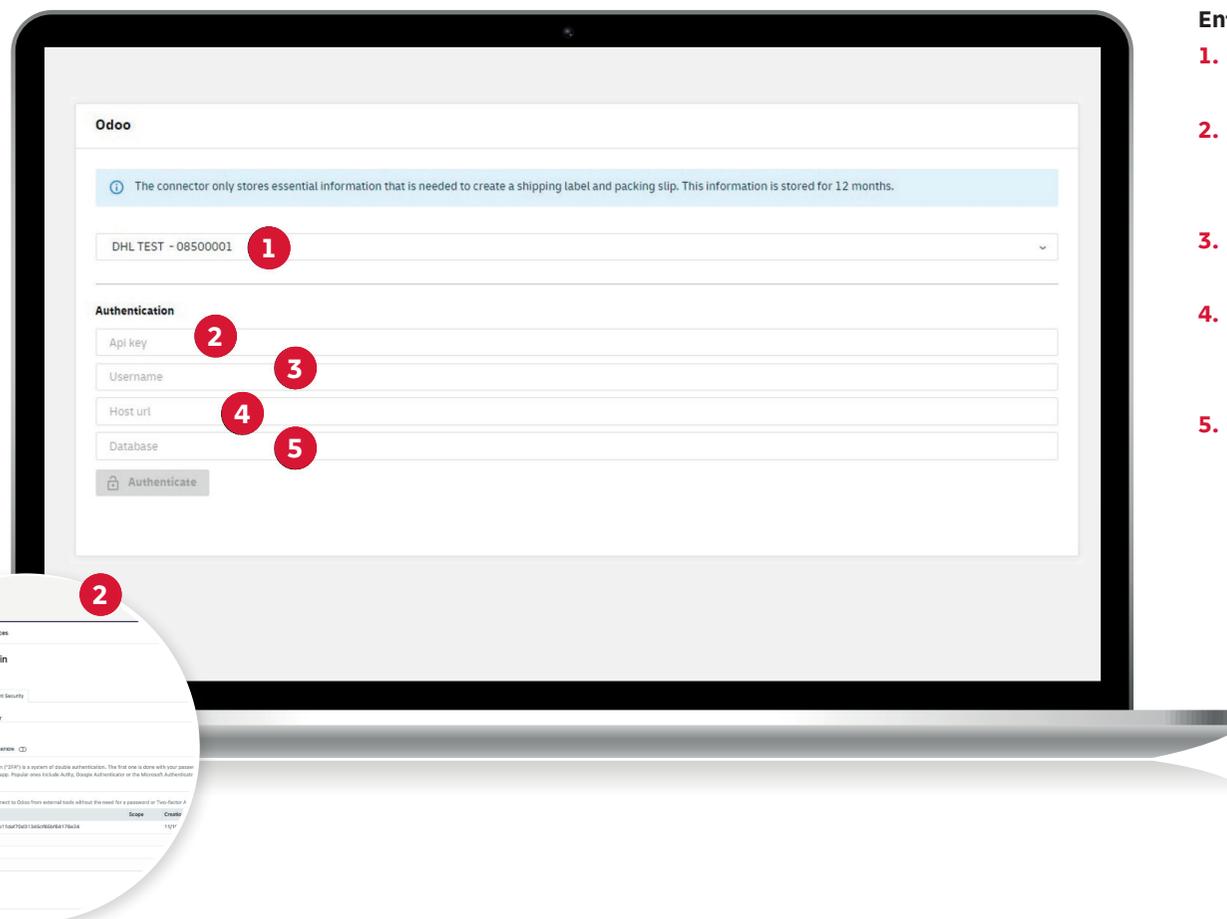

1. Log in to your Odoo administrator account.
2. Navigate to **Apps** and install the **dhl\_ecommerce** module.

## Link DHL to Odoo

3. Login to My DHL Portal.
4. Go to **Settings (1)**
5. Go to **Links (2)**
6. Select **Odoo (3)**

## AUTHENTICATE ODOO

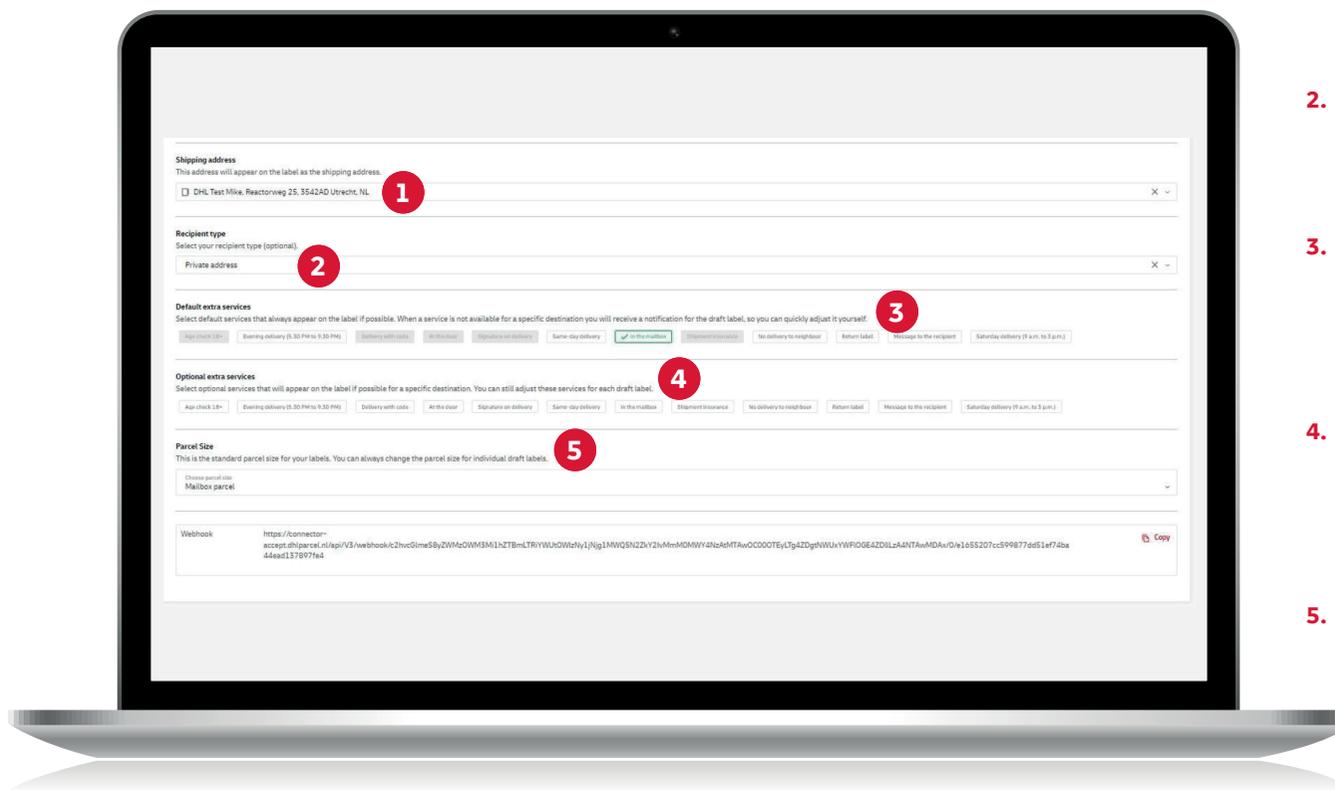

Enter the following information:

- 1. Customer number (1)**  
Select your customer number.
- 2. Odoo API key (2)**  
Go to **My Preferences** and click on **Account Security** in your Odoo account menu to find or generate your API Key.
- 3. Odoo user name (3)**  
This is the e-mail address you use to log in to the Odoo environment.
- 4. Odoo host url (4)**  
This is the full url of the Odoo shop.  
**For example:** <https://odoo-demo-accept.dhlecommerce.nl/>
- 5. Odoo database (5)**  
Go to **Settings** and click on **Activate developer mode**.  
The database name is in parentheses next to your profile name, such as 'dhlecommerce' in this example.

## FILL IN MISSING DATA

### Once authorized, fill in the missing data

#### 1. Shipping address (1)

Name and address of the sender as printed on the label.

New addresses are added via **Address Book** in My DHL Portal.

#### 2. Type of recipient (2)

Here you indicate whether the recipients of your shipments are business or private. Keep in mind that different conditions, services and rates apply there.

#### 3. Standard additional services (3)

Would you like to use additional services for all shipments? Then set that up here. If certain services cannot be combined, or are not possible for a particular type of recipient or destination, you will receive an error message. You must edit the draft before you can print the label.

#### 4. Optional shipping options (4)

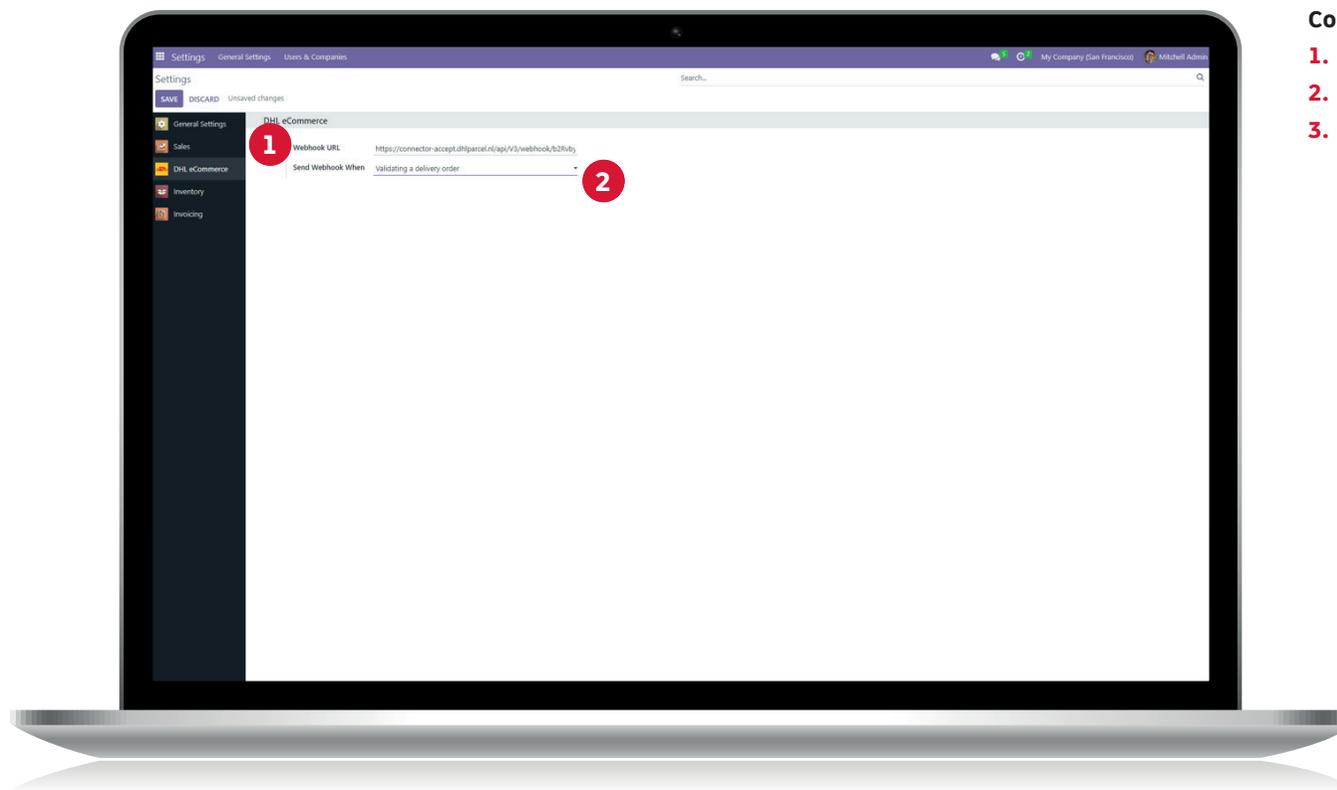

If you select services here that cannot be combined, or are not possible for a particular type of recipient or destination, you will not get an error message. The additional service is simply omitted, and the shipment is created.

#### 5. Package size (5)

The standard package size that we use for your drafts

## COPYING WEBHOOK

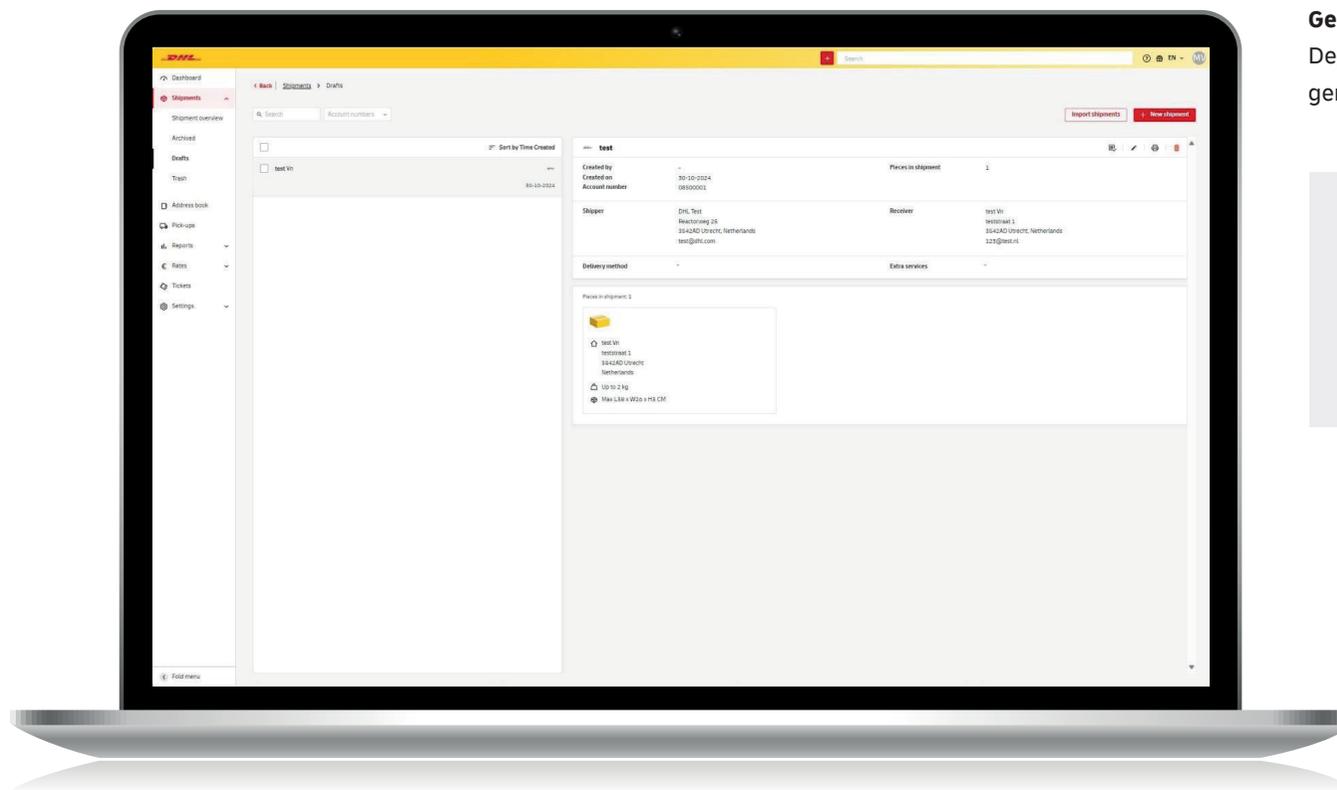

### Copy the webhook and go to your Odoo environment

1. In Odoo, go to **Settings** and select the DHL eCommerce module.
2. Paste your **webhook (1)** in the appropriate field.
3. Select when you want to create a **draft order (2)**:
  - If you are confirming a delivery order: 'Validating a delivery order'
  - If there is new stock: 'A new stock pick is created'
  - If you are creating a sales order: 'Sales order is created'

## MAKING LABELS

### Generate labels

Depending on the selection you have made, a draft label is automatically generated in My DHL Portal.

### NEED SUPPORT?

If you have questions or problems while installing or configuring Odoo, then our support team is here for you. Contact us at [ecommercesales.applicationsupport@dhl.com](mailto:ecommercesales.applicationsupport@dhl.com)
